

	Upward force = $ma + \text{weight} = m(a + g) = 3.0(1.2 + 9.81) = 33.63 \text{ N}$ weight.
4	Ans: A Taking the direction to the right as positive, $20 + (-12) = 12 + (-P_x)$ $P_x = 4 \text{ N s}$

2

5

Ans: A
