

1a	The <u>weight of displaced water</u> is equal to the <u>weight of the wooden block</u> . The weights for both beakers are the same / the readings are the same	M1 A1
1b(i)1	 Arrows are equal in length with correct labels	B1
1b(i)2	 Arrows are equal in length with correct labels Lengths of arrows are longer than in 1b(i)1	B1 B1
1b(ii)	$C = P + Q - T = P + Q - (Q - R) = P + R$ $= 3.00 + 0.20 = 3.20 \text{ N}$	C1 A1
1b(iii)	Initial reading = 3.20 N Final reading = $P + Q = 3.00 - 1.13 = 4.13 \text{ N}$ Change = $4.13 - 3.20 = 0.93 \text{ N}$	C1 A1

2a	$g = GM / R^2$
