

	velocity is not along the field line. Hence the path of the charged particle is not along the field line.	
18 L2	Solution: C Treating the sphere as a point source, At 0.5 m $F = \frac{kq_{sphere}q}{0.5^2}$ At 1.0 m $F_{new} = \frac{kq_{sphere}q}{1.0^2} = \frac{1}{4} \frac{kq_{sphere}q}{0.5^2} = \frac{1}{4} F$	

	At 0.5 m $W = U = \frac{kq_{sphere}q}{0.5}$	
	At 1.0 m $W_{new} = \frac{kq_{sphere}q}{1.0} = \frac{1}{2} \frac{kq_{sphere}q}{0.5} = \frac{1}{2} W$	

19	Solution: A
