14	B	For a closed pipe, the resonant lengths are odd multiples of the shortest length. (Wavelength / 4 = L_1; 3 Wavelength / 4 = L_2; 5 Wavelength / 4 = L_3) Taking the ratio of the 2 given lengths 30/18 gives 5/3. Hence 30 is the 5th resonance length while 18 is the third resonance length, and the shortest length is 6 cm. All odd multiples of 6 cm produces resonance.
15	C	Since the orders overlap at the same angle:
