

D	$(-30) + (30) = 20$	$30 - (-30) = 60$
-----	---------------------	-------------------

6

Ans: B

Rotational equilibrium: $\Sigma M = 0$

Since 4.0 N force is passing through the pivot, it does not create any moment.

Clockwise moment about O = Anticlockwise moment about O

$$F \times 5.0 = 2.0 \sin 30^\circ \times 4.0 + 3.0 \times 2.0$$

$$F = 2.0 \text{ N}$$
