

		The peak current $I_0 = \sqrt{2} I_1 = \sqrt{2} (2I)$
27	C	$E = [-1.5 - (-3.5)] \times 1.6 \times 10^{-19} = 3.2 \times 10^{-19}$ $E = hf = hc / \lambda \rightarrow \lambda = hc / E = 6.63 \times 10^{-34} \times 3 \times 10^8 / 3.2 \times 10^{-19}$ $= 6 \times 10^{-7} \text{ m} \rightarrow \text{visible light}$
28	B	The two peaks are the ones that are dependent.
