

4	A	The pair of action and reaction forces (Newton's third law) must act on separate bodies.
5	C	before  after  For elastic collision, relative speed of approach = relative speed of separation $v_2 - v_1 = u_1 - u_2$ (where the sign conventions of u_1, u_2, v_1, v_2 are to the right) Hence $u_X - (-u_Y) = v_Y - (-v_X)$ → $u_X + u_Y = v_X + v_Y$
6	C	Raw Power input = Rate of GPE converted to Electrical Energy
