2 An object is dropped at time $t = 0$ s from a tall building. Air resistance is significant.
Three graphs are plotted against time:

- the height of the object above the ground
- the speed of the object
- the magnitude of the resultant force on the object.

What are the quantities X, Y and Z?

	height of the object above the ground	speed of the object	magnitude of the resultant force on the object
A	X	Y	Z
B	X	Z	Y
C	Z	Y	X
D	Y	Z	X
