16 A mixture of two gases at constant temperature contains molecules of two kinds, the first of mass m_1 and r.m.s. speed c_1, the second of mass m_2 and r.m.s. speed c_2.

Which expression gives the value of $\frac{c_1}{c_2}$?

A $\frac{m_1}{m_2}$ **B** $\sqrt{\frac{m_1}{m_2}}$ **C** 1 **D** $\sqrt{\frac{m_2}{m_1}}$
