18 The first law of thermodynamics states that the change in internal energy ΔU of a system is related to the heat Q supplied to it and the work done W on it by the equation

$$\Delta U = Q + W$$

What are ΔU, Q and W for a constant mass of ideal gas which is heated at constant pressure?

	ΔU	Q	W
A	negative	negative	positive
B	positive	positive	positive
C	zero	negative	negative
D	positive	positive	negative
