

11	D	
12	D	At steady state, pressure in both flasks are the same. Applying ideal gas law $P_P = P_Q$ $\frac{n_P RT_P}{V_P} = \frac{n_Q RT_Q}{V_Q}$ $\frac{M_P}{M_Q} = \frac{T_Q}{T_P} \frac{V_P}{V_Q} = 9$
13	A	$nV = nRT$
