

[illegible]

6ci	e.m. radiation produced whenever charged particle is accelerated electrons hitting target have distribution of accelerations	A	M1 A1
6cii	all electron energy given up in one collision/converted to a single photon (since $\lambda_{\min} = hc / E_{\max,}$) maximum photon energy corresponds to minimum wavelength	A	B1 B1

7aj	To prevent microwave/(em) radiation from leaking/escaping out/exiting of the	E	A1
