The graphs show possible current-voltage (I - V) relationships for a filament lamp and for a semiconductor diode.

Which row best specifies the correct I - V graphs for the lamp and the diode?

filament lamp

semiconductor diode

	A	P	R
	B	P	S
	C	Q	R
	D	Q	S
	Answer: A Graph P shows the resistance decreasing as voltages increases. Graph R shows part of the I-V graph for the semiconductor diode where the graph on the positive x-axis shows the semiconductor in forward bias.
