

**2**

**B**

Units on right side = (unit of  $k$ )( $A^2$ )(m/m)<sup>2</sup> = (unit of  $k$ )( $A^2$ )

Units on left side =  $W$

unit of  $k = W / A^2 = (W/A)(A) = V/A = \Omega$

**3**

**D**

$v$  increases as the skydiver accelerates vertically downwards.
