

- 19** Monochromatic light of wavelength 600 nm diffracts through a single slit of width 0.01 mm.

What is the angular width of the central maximum of the diffraction pattern?

- A** 0.0034° **B** 0.0069° **C** 3.4° **D** 6.9°

Ans: D

Use the formula $\sin\theta = \lambda/b$

Angular width = 2θ

- 20** An ideal cell is connected across a resistor for an unknown period of time
