

to accelerate down the slope, $mg \sin \theta > mg$.

5 Ans: C

Acceleration is the same for each block.

For the left most first block, $T_A = ma$

2nd block, $T_B - T_A = ma$, $T_B = 2ma$

3rd block, $T_C - T_B = ma$, $T_C = 3ma$

Hence, T_C is the greatest.

6 Ans: C
