

10.

Ans: D

$$a_{\max} = \frac{F_{\max}}{m_e} = \frac{8.0 \times 10^{-22}}{9.11 \times 10^{-31}}$$
$$= 8.78 \times 10^8 \text{ m s}^{-2}$$
$$a_{\max} = \omega^2 x_o$$
$$x_o = a_{\max} / (2\pi f)^2 = 5.6 \times 10^{-4} \text{ m}$$
