

28.

Ans: C

$$\Delta p = \frac{2}{100} \times 6.25 \times 10^{-23}$$

$$= 1.25 \times 10^{-24}$$

$$\Delta p \Delta x \leq h$$

$$\Delta x \leq \frac{h}{\Delta p} = \frac{6.63 \times 10^{-34}}{1.25 \times 10^{-24}} = 5.30 \times 10^{-10}$$

29.

Ans: B
