

Q25

$$V_{rms} = \sqrt{\frac{\int_0^T V^2 dt}{T}} = \sqrt{\frac{(4^2)(0.1) + (-2)^2(0.1)}{0.2}}$$
$$= 3.16 \text{ V}$$

$$\langle P \rangle = \frac{V_{rms}^2}{R} = \frac{3.16^2}{20} = 0.50 \text{ W}$$

Ans: B
