

S/N	Answer	Explanation
1	B	$[\sigma]$ $= \frac{[\text{energy}]}{[\text{time}][\text{area}][T^4]} = \frac{\text{J}}{\text{s m}^2 \text{ K}^4} = \frac{\text{kg m s}^{-2} \text{ m}}{\text{s m}^2 \text{ K}^4}$ $= \text{kg s}^{-3} \text{ K}^{-4}$
2	C	A implies large random error
