

		D implies a possible error in the experiment (one data point)
3	B	Estimation of values required: Mass of car = 1000 kg Speed limit on expressway = 90 km h⁻¹ $\Delta p = 1000 \left(\frac{90 \times 1000}{3600} - 0 \right) = 25\,000 = 2.5 \times 10^4 \text{ kg m s}^{-1}$
4	A	The gas bubbles initially accelerate upwards before travelling at a terminal
