27 An electron is in the $n = 2$ quantum state of a one-dimensional box with kinetic energy of 6.0 eV.
A proton is in the $n = 3$ quantum state of another one-dimensional box with kinetic energy of 0.20 eV.

What is the ratio of the width of the electron's box to the width of the proton's box?

A 0.19 **B** 3.5 **C** 5.2 **D** 7.8
