4 A camera drone of mass 1.20 kg hovers steadily above ground using four propellers. Each of the propellers pushes 0.50 kg of air vertically downward each second.

Assume that the air above the propellers is stationary and that the drone remains level throughout.

What is the speed of the air leaving each propeller?

A 1.2 m s^{-1} **B** 2.9 m s^{-1} **C** 5.9 m s^{-1} **D** 24 m s^{-1}
