25 Two long straight wires P and Q are placed perpendicular to each other at a distance *d* apart. A current flows into the page in wire P while a current flows from left to right in wire Q.

What are the directions of the forces acting on wire Q at points Y and Z due to the magnetic field produced by wire P?

	force at Y	force at Z
A	out of page	into page
B	into page	out of page
C	towards P	away from P
D	towards P	towards P
