7 A proton (1u) traveling with velocity + 0.100*c* collides elastically head-on with a helium nucleus (4u) traveling with velocity – 0.050*c*.

What are the velocities of each particle after the collision?

	Proton	Helium nucleus
A	– 0.140*c*	+ 0.010*c*
B	+ 0.140*c*	+ 0.010*c*
C	+ 0.233*c*	– 0.083*c*
D	– 0.233*c*	+ 0.083*c*
