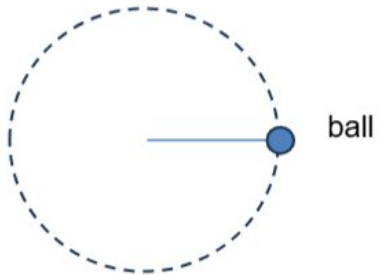
10 A ball of mass 0.30 kg is attached to a light, inextensible string. It is rotated in a vertical circle. The length of the string is 0.60 m and the tangential speed of the ball when the string is horizontal is 4.0 m s^{-1}.



What is the net force acting on the ball when the string is horizontal?

A 2.9 N **B** 8.0 N **C** 8.5 N **D** 10.9 N
