9 The diagram shows an arrangement used to find the output power of an electric motor.

The wheel attached to the motor's axle has a diameter of 35 cm. The belt which passes over it is stationary when the wheel is making 20 revolutions per second.

What is the output power of the motor?

A 250 W **B** 770 W **C** 1300 W **D** 1900 W
