

		$R = \frac{170}{\cos 18^\circ} (\sin 18^\circ) = 170 \text{ N}$
7	C	Taking moments about pivot, $P(30) = Q(70)$ $\frac{P}{Q} = \frac{7}{3}$
8	C	$m_1 a_1 b_1 = m_2 a_2 b_2$ $1000 \times 0.2 \times 0.01 = 10$
