

	Action-reaction must be of the same type. Weight is the gravitational force on the man due to the Earth.
6	D Consider vertical equilibrium of the object in water, taking upwards as positive $P + V\rho_{\text{water}} g - W = 0$ $\rho_{\text{water}} = \frac{W - P}{Vg}$

Consider vertical equilibrium of the object in oil, taking upwards as positive

$$Q + V\rho_{oil} g - W = 0$$

$$\rho_{oil} = \frac{W - Q}{Vg}$$

$$\frac{\rho_{oil}}{\rho_{water}} = \frac{W - Q}{W - P}$$
