

10

D

At the Earth's surface: $W = \frac{GMm}{R^2}$

At orbit: $F = \frac{GMm}{(R + 6R)^2} = \frac{1}{49} \left(\frac{GMm}{R^2} \right) = \frac{W}{49}$

11

C

For geostationary satellites, all satellites orbit the Earth at a fixed distance from
