

		D	$(1.50) - (-0.50) = 1.00 \text{ m/s}$	
--	--	----------	---------------------------------------	--

5 **B** By Newton's Third Law of Motion,
the magnitude of the force exerted on m_1 by m_2 is equal to the magnitude of the
force exerted on m_2 by m_1 .

6 **A** Air resistance increases proportionately with speed
