

22	Answer: A
	 The diagram illustrates the forces acting on a sphere. On the left, a solid circle represents the sphere with a center point. A horizontal dashed line and a vertical dashed line intersect at the center. A force vector F_B points horizontally to the left from the center, and a force vector F_E points vertically downwards from the center. To the right, a dashed ellipse represents a free-body diagram. It contains the same force vectors F_B (horizontal left) and F_E (vertical down). A horizontal vector v points to the right, and a vertical vector B points downwards. Above the ellipse, a dashed line forms a loop with the label "-ve" inside it.

22	Answer: A
