

24	Answer: C
	To find I_{rms}, first square the graph, find total area over 1 period, find the average area over 1 period, then square root. $I_{rms} = \sqrt{\frac{4.0^2 \times 1 + 2.0^2 \times 2}{4}}$ $= 2.45 \text{ A}$ $P_{ave} = I_{rms}^2 R$ $= 2.45^2 \times 11$ $= 66 \text{ W}$

25	Answer: B
