

4

Answer: D

For Z,
For Y,

$$F_{YZ} = 4ma \quad \dots\dots(1)$$

$$F_{XY} - F_{ZY} = 3ma \quad \dots\dots(2)$$

From Newton's 3rd Law:

$$|F_{YZ}| = |F_{ZY}| = 4ma \quad \dots\dots(3)$$

From (2) & (3),

$$F_{XY} - 4ma = 3ma$$

$$F_{XY} = 7ma = F_{YX}$$

Thus, $\frac{F_{YX}}{F_{ZY}} = \frac{7ma}{4ma} = \frac{7}{4}$

5	Answer: C
