

		$R = 104 \text{ km}$ (0.51)
9	B	At B, resultant force towards centre of dome $F_{\text{net}} = mg \cos 48.2^\circ$ Centripetal acceleration = $F_{\text{net}} / m = g \cos 48.2^\circ = 6.54 \text{ m s}^{-2}$
10	B	Geostationary orbit is always at the same radius have the same period and
