

- 17 Two waves approach each other with speed 1 cm s^{-1} , as shown in the figure below.

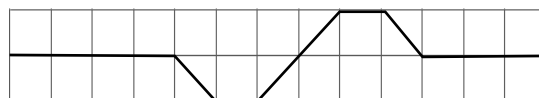

Which of the following gives the result of the superposition of the waves 4 s later?

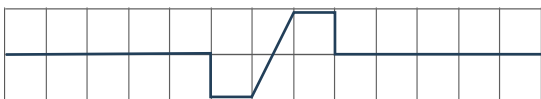

A

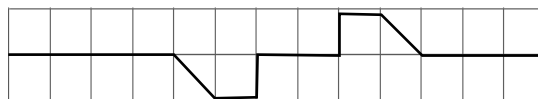

B

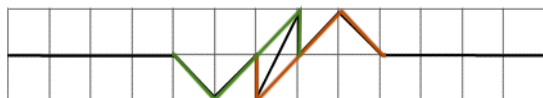

C

D

Ans: A

19 Two fixed point charges, each of magnitude $Q_1 = -7.4 \text{ nC}$ and $Q_2 = +3.6 \text{ nC}$, are located at O
