

		two sources i.e. shorter λ and D and larger u .
21	D	Charge of sphere is Q. $V = \frac{Q}{4\pi\epsilon_0 R} \quad \Rightarrow \quad Q = 4\pi\epsilon_0 R V$ $F = \frac{Qq}{4\pi\epsilon_0 r^2} = \frac{4\pi\epsilon_0 R V q}{4\pi\epsilon_0 r^2} = \frac{qVR}{r^2}$
22	B	magnitude of E at P due to $+64Q$
