

	increasing intensity for a monochromatic light will increase the number of photons incident.
27.	Ans: C Using $\Delta x \Delta p \geq h$, $\frac{\Delta v}{v} \times 100 = 0.005$ $\Delta v = \frac{0.005}{100} \times 2.0 \times 10^6 = 100 \text{ m s}^{-1}$ $\Delta x \geq \frac{h}{\Delta(mv)} = \frac{h}{m\Delta v} = \frac{6.63 \times 10^{-34}}{9.11 \times 10^{-31} \times 100}$ $= 7.278 \times 10^{-6}$ $= 7.3 \times 10^{-6} \text{ m}$
28.	Ans: D
