

	the same direction) than the acceleration of the way down (air resistance and weight acting in opposite directions), the time taken on way up will be less.
4.	Ans: B $impulse = \frac{1}{2}(62)(0.21) = 6.51 \text{ kg m s}^{-1}$ $v = \frac{p}{m} = \frac{6.51}{0.150} = 43.4 \text{ m s}^{-1}$
5	Ans: C
