

	$m = 0.100$
5.	Ans: C $acceleration = \frac{(10)(9.81)}{10 + 12} = 4.459 \text{ m s}^{-2}$ By considering the 12 kg block, tension = resultant force Hence, $tension = (12)(4.459) = 53.5 \text{ N}$
6	Ans: C
