

2 **Ans: D**

$$s = \frac{1}{2} at^2$$

$$a = 2s/t^2 = 0.14667 \text{ ms}^{-2}$$

$$\begin{aligned}\Delta a/a &= \Delta s/s + 2 \Delta t/t \\ \Delta a/0.14667 &= 0.1/16.5 + 2(1/15) \\ \Delta a/0.14667 &= 0.13939\end{aligned}$$

$$\Delta a = 0.02044 = 0.02 \text{ ms}^{-2}$$

$$a = (0.14667 \pm 0.02) = (0.15 \pm 0.02) \text{ ms}^{-2}$$
