

15	A	$ma = mg - R$ Object will remain in contact when R is greater than 0. Object will lose contact when $R = 0$, $ma = mg$ For SHM, $a = \omega^2 x_o = (2\pi f)^2 x_o = g$ $x_o = \frac{g}{(2\pi f)^2} = \frac{9.81}{(2\pi(2.0))^2} = 9.81/(2\pi(3.0))^2 = 0.028 \text{ m}$
