

		By Newton's 3 rd Law, Force by water on wall = Force by wall on water = 0.314 N
7	D	On each cuboid ;

2024 H2 Physics Paper 1 Solutions

		Volume of water displaced is the same, therefore U is constant for all cuboids of equal volume. $T + U = mg$ $T + U = \rho Vg$ (where ρ is density of material/cuboid) $T = \rho Vg - U$ Since cuboid W has largest density, T on string is the largest.
