

		$2 \times 2 \times 1 \times 2 \times 1$
9	D	Since P and Q have the same angular velocity, the linear speed ($v = r\omega$) of P is greater than Q as $r_1 > r_2$. Also, centripetal force ($F = mr\omega^2$) is greater for P than Q as $r_1 > r_2$.
10	B	At D: $N = mg = mv^2/r$
