

14	B	Look for minimum cycle (pattern) that repeats. Distance between two successive tall peaks = 5 cm Period $T = (5 \text{ cm})(2.00 \text{ ms cm}^{-1}) = 10 \text{ ms}$ $f = \frac{1}{T} = \frac{1}{(10 \times 10^{-3})} = 100 \text{ Hz}$
15	D	Each component light beam has the amplitude $A_1 = A_2 = 4.5^\circ$
