

- 12** A mass of an ideal gas of volume V and pressure p undergoes the cycle of changes as shown below.

Which of the following shows the states of the gas arranged in the order of decreasing temperature?

- A** J K L M
- B** J K M L
- C** K L M J
- D** L M K J

13 An ideal gas undergoes an expansion in volume from $1.3 \times 10^{-4} \text{ m}^3$ to $3.6 \times 10^{-4} \text{ m}^3$ at a
