

Answer: B

14 With respect from origin,
phase angle of P = $\cos^{-1}(0) = 90^\circ$

$$\text{phase angle of Q} = 360^\circ - \cos^{-1}\left(\frac{0.5y_0}{y_0}\right) = 300^\circ$$

Hence, phase angle between P and Q = $300^\circ - 90^\circ = 210^\circ$

Answer: C

15 The regions of electromagnetic spectrum in increasing wavelength are as follows:
