

14

Gravitational force on A and on B = $\frac{GM_A M_B}{D^2}$

For A: $\frac{GM_A M_B}{D^2} = M_A R \omega^2$

For B: $\frac{GM_A M_B}{D^2} = M_B (D - R) \omega^2$

15

Using Formula $PV = nRT$,
It is observed that T_M is lowest T_N is the highest
