24 Two ions P and Q pass through a velocity selector un-deviated. Ion Q has 2 times the charge and 1.5 times the mass of ion P.

They then enter a region of uniform magnetic field where P travels in a circular arc of radius 3.7 cm.

What is the radius of the circular arc travelled by ion Q in the uniform magnetic field?

A 1.2 cm **B** 2.8 cm **C** 4.9 cm **D** 11 cm
