

3	A man is parachuting towards the Earth. According to Newton's third law of motion, the force which makes an action-reaction pair with the gravitational force on the man is	
	A	the gravitational force on the Earth due to the man.
	B	the viscous force of the man and his parachute on the air.
	C	the viscous force of the air on the man and his parachute.
	D	the tension in the harness of the parachute.

Answer: A

Understanding and applying N3L.
